

>> MOST EFFECTIVE WAY TO ORGANISE YOUR GARAGE

Eliminate clutter! Get all of your items up off the floor and neatly onto the wall, while still providing quick access to them. The StorPanel hooks, hangers, racks, baskets and shelves can be used in unlimited configurations and be adjusted over time as your requirements change.

>> StorPanel

1. MEASURE

2. INSTALL STRIPS

3. HANG PANELS

Installation is simple. First measure width of StorPanels and how many you require. Next screw metal hanging strips to the wall. Finally slide the StorPanel lengths onto the hanging strips. You are then ready to simply clip in the accessories and store your items.

Our separate installation guide offers more information including detailed steps, hints and tips.

Browse through our extensive accessory range to start planning your StorPanel wall organisation system.
